

Maksim Chuprin

Frontend Developer | 6+ years | Vue / Nuxt / TypeScript

ABOUT ME

I develop and optimize web applications. I specialize in refactoring legacy projects, building architecture, and implementing CI/CD. I actively use AI tools in my work — Claude Code, Cursor, DeepSeek.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Vue, Nuxt, Pinia, Vuex, Vue Query

UI: Tailwind, Element Plus, Vuetify, Bootstrap

Build & CI: Vite, Webpack, Docker, Nginx, GitLab CI, GitHub Actions

Code Quality: ESLint, Prettier, Husky, Feature-Sliced Design, Storybook

AI Tools: Claude Code, Cursor, DeepSeek, ChatGPT, Perplexity

WORK EXPERIENCE

Frontend Developer | ITFB Group (AI, Analytics)

November 2023 — Present | Remote

Document workflow automation platform for enterprise clients.

- Developed a scenario builder for document processing — accelerated business scenario configuration
- Created a custom virtual scroll — improved document attribute rendering by 3x
- Implemented seamless page display (VBox, Zoom & Pan)
- Refactored services following Feature-Sliced Design — accelerated new feature development by 20%, reduced onboarding time for new employees by 50%
- Configured GitLab CI: builds, Docker images, deployment to Kubernetes
- Standardized the codebase: ESLint, Prettier, Husky pre-commit hooks

Stack: Vue, Vue Query, Pinia, TypeScript, Class Transformer, Vue Draggable, Vite, Element Plus, Storybook, Docker, Nginx

Frontend Developer | Idaproject (Real Estate)

June 2022 — October 2023 | Remote

Residential and commercial real estate project for a developer. Object catalog, filtering, visualization.

- Migrated the project from jQuery to Vue + TypeScript — accelerated development by 40%, reduced bundle size by 30%
- Migrated templates from Django Templates to Nuxt — improved application loading speed by 2x
- Developed a dynamic filtering module for commercial spaces

- Created an external questionnaire (iframe) for collecting statistics

Stack: Vue, Nuxt, TypeScript, Django Templates, jQuery, Webpack, Tailwind

Frontend Developer | Fortech (eCommerce, TravelTech)

February 2020 — May 2022 | Remote

1) Hotel network analytics dashboard

- Developed an analytics dashboard with JWT authentication
- Configured project setup: ESLint, Prettier, Webpack, TypeScript

Stack: React, Redux, TypeScript, Webpack, Bootstrap

2) 3D kitchen furniture visualization

- Redesigned UI based on the new design system
- Implemented Storybook — documented all UI, reduced duplicate code by 50%

Stack: Vue, TypeScript, Webpack, Storybook, Vuetify
